What is this resource and how do I use it?

Number bonds is a term used to describe numbers that add together to make another number. For example, number bonds to 10 include 5 and 5, 9 and 1, etc. These are important for your child to learn as they progress through mathematics. This board game is a great way to encourage children to practise this skill.

What skills does this practise?

Turn Taking

Number Bonds

Addition

Mental Maths

Further Activity Ideas and Suggestions

Maths is a vital part of your child's education, but it doesn't have to be boring or difficult - just turn it into a game! Try the resources in our [Visual Aids](#) section to help them grasp the concept, then make it fun [here](#).

Number Bonds to 10 Game

How to play:

Roll the dice, move that amount of spaces, then call out the number you would need to add to make 10. For example, if you land on a 7, you would say 3. If the player gets it right, they stay on that square and play moves on. If not, they go back to the square they started on. If a player lands on an activity square, they must do that activity to stay there.

More ways to play:

To make it harder for older children, you could add a 5 second timer. If younger children are joining in, they could just call out the number on the square - this will not practise number bonds but it is great for those learning to recognise numbers.

Which superhero likes to use public transportation?

Bus Lightyear

Why is Batman so serious?

He isn't the Joker.
